Word	Description
Pandas	Pandas is an open source, high-performance, easy-to-use data structure and data analysis library for the Python programming language. Some of the highlights of Pandas are: - A fast and efficient DataFrame object for data manipulation with integrated indexing. - Tools for reading and writing data between in-memory data structures and different formats: CSV and text files, Microsoft Excel, SQL databases, and the fast HDF5 format. - Flexible reshaping and pivoting of data sets. - Columns can be inserted and deleted from data structures for size mutability. - High performance merging and joining of data sets.
